

March News:

Our Environmental Leaders for the 2017 school year are Elias, Chloe and Ollie.

They have spent this month brainstorming ideas for our new space and putting together their project for Green School. They will attend Green School April 28th and are excited to share what is happening at Parkdale and learn about what others schools are doing in their gardens.

Cooking: Students have been harvesting vegetables this term. Their highlight was making pita pizzas. Students were very creative in their pizza making and some of the pizza's had eggplant, capsicum, tomatoes, silver beet topped with 4 different types of cheese. Yum!

The students have spent many Friday's digging up the new area and removing rocks and plants. We were able to finish the space during our Garden Club Working Bee. The space looks great and we are very excited to start using the new space next term.
