

August News:

Winter has not stopped Parkdale's gardeners. We have had a busy term starting off with the Foundation students eating their vegetables they planted last term in their healthy wraps.

We then turned our focus into the Father's Day stall and spent time prepping jars and plants. This year the students made bug hotels, planted succulents and native Australian plants and their favourite activity was making rosemary lemon salt. We had lots of fun creating these to sell at the stall and were very proud on how quickly they sold. We hope all the Dad's enjoyed their gifts as much as we did making them.

Our lemon tree has been very kind to us and we have spent a few cooking days making yummy sweet and sometimes sour lemonade. We then made some lemon curd which we had with some delicious pancakes.
